MANAGING CHRONIC BLADDER PAIN IN PATIENTS WHO ARE DIAGNOSED WITH INTERSTITIAL CYSTITIS (IC)

Although patients with IC are likely to have higher Pelvic Pain and Urgency/Frequency (PUF) scores, the questionnaire cannot exclude other conditions with similar symptoms and is not sufficient to diagnose IC independent of medical history, physical examination, and appropriate diagnostic measures.

ELMIRON® is a weak anticoagulant (blood thinner) which may increase anticoagulant activity.

- **Alopecia:** In clinical trials of ELMIRON®, alopecia began within the first 4 weeks of treatment. Ninety-seven percent (97%) of the cases of alopecia began within the first 4 weeks of treatment. Ninety-seven percent (97%) of the cases of alopecia began within the first 4 weeks of treatment.
